Response to Arguments

Applicant's arguments with respect to claims 1 - 6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

Claim 1 is objected to because of the following informalities: it is suggested to change "files" (line 8) to - -file- - because only one such 'file' has been recited.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3661

Claims 1 – 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Ohler (US 6,591,188 B1).

Regarding claim 1, Ohler teaches a method of making a driving path log file library for searching (learning) a car navigation path comprising operating a car navigation system (10) and deciding whether or not to store (record) a driving path of a driver (steps 72 – 76; fig. 3); when the driver decides [manually] to store the driving path, making a driving path log file with the driving path of the driver and storing (in DB 39) the file (col. 4, lines 15 – 31 at least); making a driving path library out of the stored file (in item 37), wherein the log file comprises the path the driver has driven through and then selected – the library comprises stored driving path files [routes] (col. 2; lines 15-16; col. 4, lines 7 – 22 at least).

Regarding claim 3, Ohler further teaches the file stored with an actual driving time zone (see fig. 4; col. 2, lines 17 – 21; col. 5, lines 51 – 56 at least).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 4 – 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohler ('188) as applied to claim 1 and further in view of LeFebvre et al. (US 5,659,476).

As discussed above, Ohler teaches all of the limitations except for this idea of the driving path reflecting a relatively short path searched through a shortest path algorithm and map-matching the path.

However, LeFebvre teaches, in the same field of endeavor of searching a navigation path, a driving path reflecting a relatively short path searched through a shortest path algorithm and map-matching the path (col. 4, lines 33 – 43 at least).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Ohler's teaching by including a driving path reflecting a relatively short path searched through a shortest path algorithm and map-matching the path as evidenced by LeFebvre in order to quickly find the search path.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3661

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
